Software Description

xPress is an innovative digital press software product that can be used for applications such as creating invoices, tickets, coupons, stickers, letters, checks etc…, and all this easily, quickly and with minimum training time.
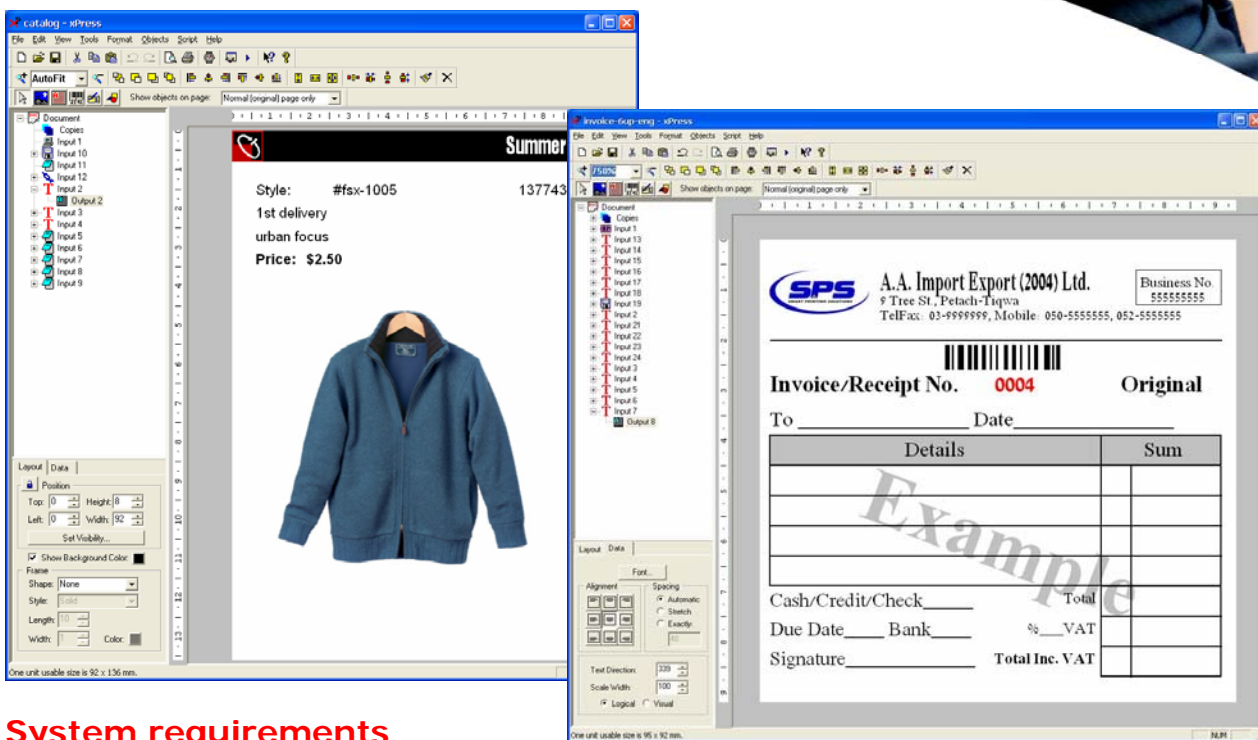

xPress allows you to define the following characteristics for application:

- Print any amount of counters (ascending or descending) in any font, angle and anywhere on the paper. The counters can be flat or deep counters.
- Printing any number of units on one page easily and efficiently without the need to adjust every unit separately (e.g. 2x3=6 in page, 2x1=2 in page etc.).
- Print original + any number of copies, and an ability to print each copy from a different paper tray.
- Add shapes, tables, texts and barcodes in any amount and anywhere on the page.
- Add pictures of different types, and directly read PDF files.
- Create Impositions of any number of pages in any direction (e.g. pace 8 units of A6 on A3 paper to form a booklet).
- Add variable data in various shapes (text, barcodes, pictures, etc.) from an Excel file or any other database file.
- Define notebooks, and print pages automatically according to the number of notebooks.
- Print MICR CMC7 / E13B / OCR-A magnetic or optical lines for checks.

xPress advantages are:

- Simple, easy to learn with a comfortable user interface.
- Ability to save application formats in order to use similar applications in the future.
- Fast and efficient printing of different application types.

Examples of creating some applications using the software

System requirements

- Operating System: Windows 2000/XP or higher.
- Hardware: Pentium 4 system with 512MB RAM or higher.
